# Hydraulic power pack

## DP-EP 085E22

Hydraulic power pack especially designed for use with the Dragflow dredging pump models HY50/108 or HY85 with or without two excavators model EXHY20. The power packs are based on Iveco NEF N45 diesel engines, that complies with latest European emission requirements, or Electric engine.

Power packs are based on first quality components and designed in order to provide the following advantages:

- Enhanced cooling of hydraulic plant
- Adaptability to different hydraulic applications
- Full control from an electronic and hydraulic control unit

Every Power Pack can be adapted to better fit customer needs with:

- Additional oil source to drive ancillary equipments (such as winches or water pumps)
- Remote control via Hydraulic line or Wireless connection
- Operator cabin for additional comfort
- Container style design

All Power Packs are manufactured and tested by Dragflow and are supplied with training and supervision of a technician from Italy.

DIESEL VERSION	ELECTRIC VERSION
<b>Diesel engine (IVECO NEF N67 or CAT C6)</b>	<b>Electric engine (EU Compliant)</b>
<b>Max power: 129kW @2.200rpm</b>	Power: 130kW
<b>Continuous power: 122 kW@1.800rpm</b>	400 – 600 V
<b>Cylinder bore: 104mmx132mm</b>	50 – 60Hz
<b>Max torque: 700Nm@1.400rpm</b>	Digital/electronic control panel
<b>6 cylinders in line</b>	
<b>Fuel consumption: 208gr/kWh@1.400rpm</b>	
<b>Diesel/oil tank: 760 l</b>	
<b>Electric plant: 12V</b>	
<b>Battery: 1x180Ah</b>	
<b>Digital/electronic control panel</b>
